INC-2052 Incident Report - Notification email delays

Date: 2026-03-26
Severity: SEV-3
Status: Resolved
Duration: about 20 minutes (14:10 to 14:30 UTC)

Summary

On 2026-03-26 transaction notification emails from notification-service were delayed for about 20 minutes. The cause was an outage at MailRelay, the external email provider used by notification-service.

Root cause

MailRelay returned errors for all send requests between 14:10 and 14:30 UTC. notification-service queued the messages and retried; all emails were delivered after MailRelay recovered. No internal change was involved.
